Executive Summary

This document describes the two first MAPS&ADAS deliverables produced within WP12.210 dissemination activities, D12.21.1 “subproject web site” and D12.21.2 “subproject brochure” as main support for subproject activities and results dissemination.

1 D12.21.1 Subproject Web Site

The subproject web site (D12.21.1) has been designed with respects to guidelines from IP Dissemination by addressing the following topics:

- Objectives
- Challenges
- Results
- Applications
- Events & milestones
- Contact
- Forum activities
- Partners

In order to facilitate the access to subproject information and also contribute to the integration of IP activities dissemination, it was agreed to integrate MAPS&ADAS web pages into PReVENT IP web site

(http://www.preventip.org/en/prevent_subprojects/horizontal_activities/maps_adas/)

In addition to these information pages, MAPS&ADAS intend to contribute to dynamic part of the PReVENT web site by providing regular inputs such as:

- Public Documents
 - Public deliverables
 - Publications, presentations and press releases

- News on MAPS&ADAS events such as workshops
- Links to relevant activities

MAPS&ADAS web site (D12.21.1) was delivered to PReVENT IP Dissemination in October 2004 for integration into PReVENT IP web site.

2 D12.21.2 Subproject Brochure

On the basis of information produced for the web site, a preliminary version of D12.21.2 “Subproject Brochure” has been designed in September 2004 to support dissemination activities such as ITS World Congress 2004 held in Nagoya in October 2004 where MAPS&ADAS activities were presented in two different sessions.

The brochure is divided into two main sections. The left section, titled 'Extended Driver Horizon', discusses the potential of digital maps for road safety and lists objectives for the PReVENT project. It features a diagram showing a car on a road with various sensors and map data. The right section, titled 'Main Results', lists key achievements and applications, and includes a list of partners and contact information for the project coordinator.

Final version of D12.21.2 will be prepared as soon as PReVENT IP brochure guidelines will be available with the objective to integrate MAPS&ADAS brochure into PReVENT IP brochure.
